

Student Calculator Needs

A Scientific Calculator is required for the following courses: Intro to Algebra, Algebra M, Geometry M, and Consumer Math. The recommended calculator is the TI-30XS MultiView. All other courses require a graphing calculator. The required calculator is the TI-84+ or TI-84+ silver. The price of these calculators can vary from store to store, so we have combined some of the more popular locations to purchase the calculator. We have also included a link that describes the two calculators so you can decide which calculator best fits your needs.
